

Trash and Recycling

Trash Carts

Can I get a smaller one?

The Town purchased a limited number of smaller 65-gallon trash carts. We do not offer cards smaller than 65-gallon size. If you over 70 years old, or have a physical handicap, please contact the DPW Trash & Recycling Dept., and we will arrange to have the smaller size delivered to your house and take back the larger size cart.

I'd like another cart

The new 95-gallon trash cart will hold up to six (6) trash bags, and is utilized in Central Falls, North Providence and West Warwick. This cart size suffices for the majority of household trash disposal needs. Please consider recycling more materials to reduce your need for a larger cart. However, depending on the availability of additional trash carts, an additional cart may be purchased for \$75.00.

They didn't pick up the extra bags and items on the ground

All material must be placed in the trash cart for collection.

I don't want the cart.

Trash will only be collected in these new trash carts. You must have this cart placed curbside for trash collection.

Do I still use my blue recycling cart?

Yes, residents will continue to use their recycling carts for recyclables. As in the past, you will continue to place your recycling cart curbside for pick-up on your trash and recycling collection day. Please do not put recyclables in your new trash carts.

What will I do with my yard waste?

Do not place yard waste in your new trash carts. The trash carts are for the normal household waste only. Yard waste will continue to be collected separately.
