In response to the question: “If you could wave a magic wand and fix one thing about Diamond Hill Park what would it be?”

There were a lot of suggestions in terms of what opportunities exist for the park. Some of the most frequently suggested items include: a playground, improving parking, improving the sports fields, a dog park, more interactive events, sledding, and having an updated community space. This is in addition to suggestions like a comprehensive plan and improved maintenance. Find below a wordle with some of the most commonly used words to answer this question:

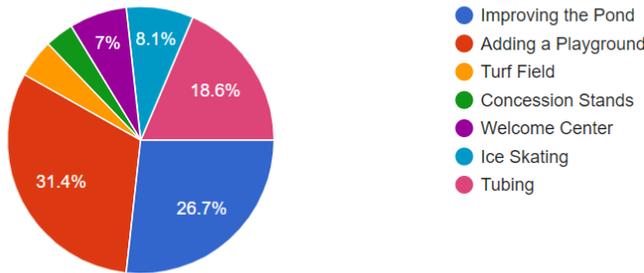

This is the current breakdown of results for our “pick one” question:

The top responses were adding a playground followed by improving the pond. This is consistent with the results we saw from the previous questions.

If you could pick only one of these improvements which would you pick?
